

ORDINANCE NO. \_\_\_\_

**AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF BELLINGHAM REGULATING  
RETAIL ESTABLISHMENTS' PROVISION OF SINGLE-USE CARRYOUT BAGS**

**WHEREAS**, the City of Bellingham (the "City") has a duty to protect the health, safety and welfare of its citizens; and

**WHEREAS**, the City continues to be a leader in sustainability as demonstrated by our Comprehensive Plan; and

**WHEREAS**, the Washington State Legislature in RCW 70.95.010(8)(a) established waste reduction as the first priority for the collection, handling, and management of solid waste; and

**WHEREAS**, the Washington State Legislature in RCW 70.95.010(4) found that it is "necessary to change manufacturing and purchasing practices and waste generation behaviors to reduce the amount of waste that becomes a governmental responsibility"; and

**WHEREAS**, the Washington State Legislature in RCW 70.95.010(6)(c) found that it is the responsibility of city governments "to assume primary responsibility for solid waste management and to develop and implement aggressive and effective waste reduction and source separation strategies"; and

**WHEREAS**, it is the City's desire to conserve resources, reduce greenhouse gas emissions (GHG), waste, litter and marine pollution and to protect the public health and welfare including wildlife, all of which increase the quality of life for the City's residents; and

**WHEREAS**, there is a need to conserve energy and natural resources, and effective litter control and reduction of single-use carryout bags will serve to accomplish such conservation; and

**WHEREAS**, even though single-use paper bags are made from renewable resources and are much less environmentally problematic in regards to litter than single-use plastic bags, they do require significant environmental resources to manufacture, transport, recycle and/or dispose of; and

**WHEREAS**, plastic bags are made of nonrenewable resources and plastic never biodegrades, it photo-degrades and can take hundreds of years for plastic bags to breakdown and when they do it is in tiny toxic bits which seep into the soil, waterways, lakes and bay; and

**WHEREAS**, numerous studies, including the Master Environmental Assessment on Single-use and Reusable Bags (MEA), document the prevalence of single-use plastic carryout bags littering the environment, blocking storm drains and fouling beaches; and

**WHEREAS**, The International Coastal Clean Up Report documents that plastic bags are a significant source of marine debris and are hazardous to marine animals and birds, which often confuse single-use plastic carryout bags for a source of food. The ingestion of these bags can result in reduced nutrient absorption and death to birds and marine animals; and

**WHEREAS**, the City's taxpayers must bear the brunt of the clean-up costs; and

**WHEREAS**, according to the 2009 population of Bellingham compared to the 2009 U.S. total plastic bag use of 87.5 billion plastic carryout bags based on statistics in the MEA, the City residents use approximately 22 million plastic carryout bags each year; and

**WHEREAS**, from an overall environmental and economic perspective, the best alternative to single-use plastic carryout bags that have an average use time of only 12 minutes is a major shift to reusable bags as reported by CNN in Fighting the Tide of Plastic Bags in a World Awash with Waste; and

**WHEREAS**, an ordinance reducing single-use bag distribution would shift consumer use to reusable bags, and help create local green jobs and in addition single-use plastic bags are often just a small part of the product line for the manufacturers in opposition to these ordinances according to Californians Against Waste (CAW); and

**WHEREAS**, studies document that regulating plastic bags and placing a mandatory charge on paper bags will dramatically reduce the use of both types of bags, according to the MEA; and

**WHEREAS**, the City has determined that a minimum cost pass-through of \$0.05 per recycled paper bag would cover the reasonable cost to a store of providing the paper bags to its customers, in addition to the savings of not purchasing single-use plastic bags; and

**WHEREAS**, other jurisdictions, according to Seattle's Alternative to Disposable Shopping Bags and Food Service Items report, have imposed paper bag fees and these fees have proven very effective at generating a major shift in consumer behavior toward the use of reusable bags and significantly reducing single-use bag consumption; and

**WHEREAS**, the proceeds from the collection of the paper bag pass-through would be retained by the retailer and this ordinance does not specify how the retailers must expend the monies collected; and

**WHEREAS**, customers have a choice to refuse a bag for a few items or choose to use a reusable bag to avoid this cost pass-through; and

**WHEREAS**, no portion of the cost pass-through will be provided to the City, and consequently, the City will not receive any revenues from the retailers' collection of the recycled paper bag pass-through; and

**WHEREAS**, to promote a shift towards the use of reusable bags by City of Bellingham consumers, a paper bag cost pass-through is an essential element of this Ordinance as it is intended to provide an incentive to customers to bring their own bag instead of purchasing paper bags when shopping at regulated stores; and

**WHEREAS**, there are several alternatives to single-use carryout bags readily available in the City, including reusable bags produced locally from sustainable materials; and

**WHEREAS**, the intent of the City is to reduce the negative impacts noted above through the implementation of this Ordinance.

**NOW, THEREFORE, THE CITY OF BELLINGHAM DOES ORDAIN:**
